

Project Engineer – Broome International Airport

Beaches, solitude, sunsets and history... Broome is one of Western Australia's iconic tourist destinations.

Company Overview:

The local and privately-owned airport at Broome has a long community connection with the town and as one of the major infrastructure providers in the region and is working hard to revitalise the local regional economy.

The Broome International Airport requires a degree qualified Project Engineer to join the Engineering team.

As Project Engineer you will be responsible for:

- Managing project activities and work scope
- Leading project teams with technical advice on contractual matters
- Driving the project so that is delivered in scope of Budget, Time, Environmental, Quality and Safety parameters
- Supervising site teams and Airport workforce

The requirements for the Project Engineer are:

- Degree qualified as a Civil Engineer and/or Project Manager
- 3-5+ years experience in the civil infrastructure environment
- Experience working in the aviation industry is highly desired but not essential
- Effective communications skills and sub-contractor management
- Sound knowledge of Microsoft Office applications

Job benefits:

- Competitive salary
- Company vehicle
- Salary sacrifice options
